

Szrek2Solutions

Lead System Architect, Christian Olsen, To Take Over Technology Leadership At Szrek2Solutions

EAST GREENWICH, RI, November 28, 2022, Szrek2Solutions announced today that Lead System Architect, Christian Olsen, will take over Technology Leadership with an official start date of January 1, 2023.

In 2004, after several years with GTECH (now IGT), Olsen joined the Szrek2Solutions' team, supporting the design and implementation of the Trusted Products Suite, and playing a key role in software development and customer deployments. "Chris's deep knowledge of our systems, extensive technical skills and vast experience make him an ideal candidate to take over the Chief Technologist position from Walter Szrek, Szrek2Solutions Co-founder," says Irena Szrek, the company President.

"I'm looking forward to moving into the technology leadership role as Walter steps into a consulting role," says Olsen. "When we started developing Trusted Draw almost 20 years ago, I never imagined the impact our products would have on the lottery industry and on the development of security standards related to electronic draws. I am especially proud of our ability to foresee the important trends and technologies related to draw operations. Our team was promoting automated and remote technologies long before the pandemic. We will continue to innovate our RNG solutions and other security products, and I look forward to seeing our progress over the next 20 years."

"As I pass the baton to Chris, I do so with the certainty that, under his leadership, the team will continue to raise RNG and security standards," said Walter Szrek. "We have worked together closely to ensure a smooth transition for all of our customers."

About Szrek2Solutions

Szrek2Solutions is a leading provider of reliable secure electronic draw systems and high performance RNG solutions for on-line games and e-instants. Partnering with leading vendors and lotteries, Szrek has deployed its unique auditable RNG platform in the US and internationally since 2005 and has an outstanding track record for its exceptional technology and excellent support. Headquartered in Rhode Island, USA, with a European office in Portugal, Szrek's customers include Arkansas Lottery, IGT Corporation, Iowa Lottery, Ithuba Holdings (South Africa), Florida Lottery, Loterie Nationale (Luxemburg), Lottomatica SpA (Italy), ONCE (Spain), Sisal SpA (Italy), Scientific Games International, Texas Lottery, and Totalizator Sportowy (Poland).
